Lecture Invite

Introduction to Space and Universe

In this lecture we will introduce the basic concepts of space. The extent of man-made satellites in exploration of solar system will also be discussed. An introduction to the hierarchical arrangement of the various celestial bodies in the universe will be summarized starting from the smallest scales to the biggest scales.

Mr. Avik Dasgupta

Avik Dasgupta is currently developing the Science Popularization program at CCSP, SGT University. He is associated with science communication and education for the past 8 years. He takes interests in developing low-cost activities and materials to reach the grassroots. He studied M.Sc. Physics with specialization in Spectroscopy and Astrophysics.
