**11<sup>th</sup> & 12<sup>th</sup> October, 2017 at  
M A Ansari Auditorium, Jamia Millia Islamia,  
New Delhi - 110025**

*Organized by  
Department of Periodontology, Faculty of Dentistry  
Jamia Millia Islamia, New Delhi - 110025*

**Background and Objectives**

A successful and rewarding general dental practice is a major challenge for dental graduates. During the undergraduate program, the students get didactic education, skill and knowledge, but may not have adequate exposure in treatment planning of difficult cases. Hence, they would often find themselves in a dilemma while treating patients with complicated medical and dental conditions.

The workshop endeavors to expose BDS students, graduates and dental practitioners in areas of specialized dentistry. There will be a strong focus on preparing dental surgeons to face the "real world" challenges in day to day dental practice. Major emphasis will be on diagnosis, investigations and treatment planning for patients with complex medical histories as well as patients requiring multidisciplinary dental treatments. Proper sequencing of treatment procedures and delivery of comprehensive care will be dealt with.

As general dentistry involves complete patient care, the participants of this workshop will get an opportunity to become skilled at amalgamation of various specialized therapeutic procedures under one roof. Medical/legal aspects pertaining to dental practice which can be a cause of concern will also be addressed in this program. It will broaden students' or practitioners' experience and help them become better professionals in an increasingly diverse world.

A wide galaxy of illustrious nationally acclaimed speakers from various specialties of dentistry will delve into the challenges of clinical practice. They will help address the dilemma faced in making decisions by the Indian Dental Surgeons on "When to Treat and When to Refer".
